

Standardization of the LADM – Modelling of non-formal RRR

Christiaan Lemmen (Kadaster) and Jenny Paulsson (KTH Royal
Institute of Technology)

Content

- Short introduction to LADM RRRs
- Legal Cadastral Domain Model (LCDM)
- Social Tenure Domain Model (STDM)
- Extended LADM
- Code lists

The paper is a discussion on how to specialize the LADM and better describe non-formal/customary RRRs

Based on the expanded LADM described in:

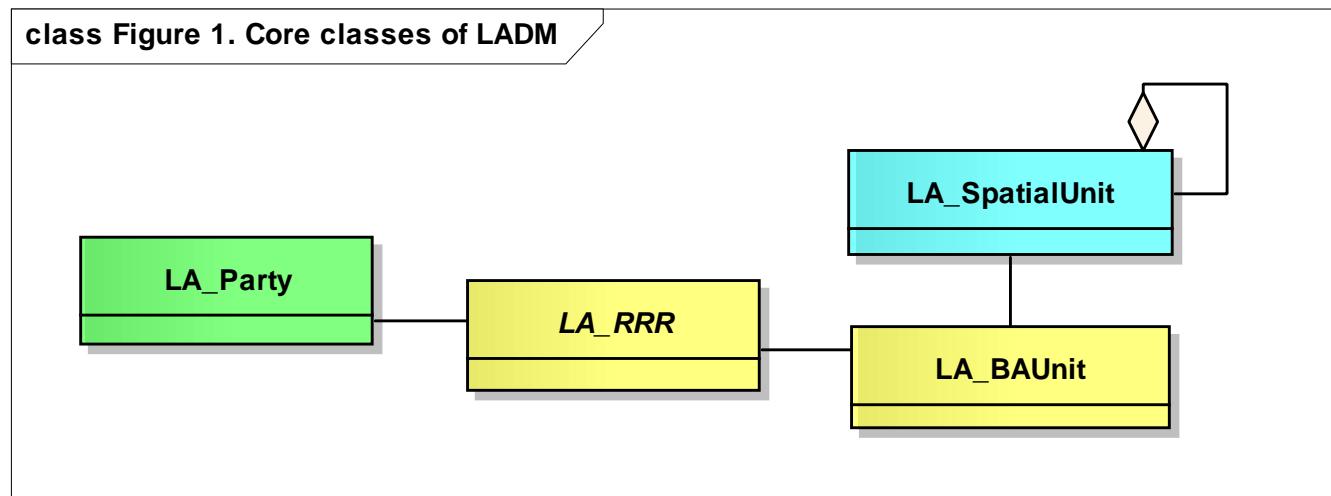

Specialization of the Land Administration Domain Model – An Option for expanding the Legal Profiles

by Paasch, J.M., van Oosterom, P.J.M., Paulsson, J. and Lemmen, C.H.J. FIG Working Week, Abuja, Nigeria, May 2013.

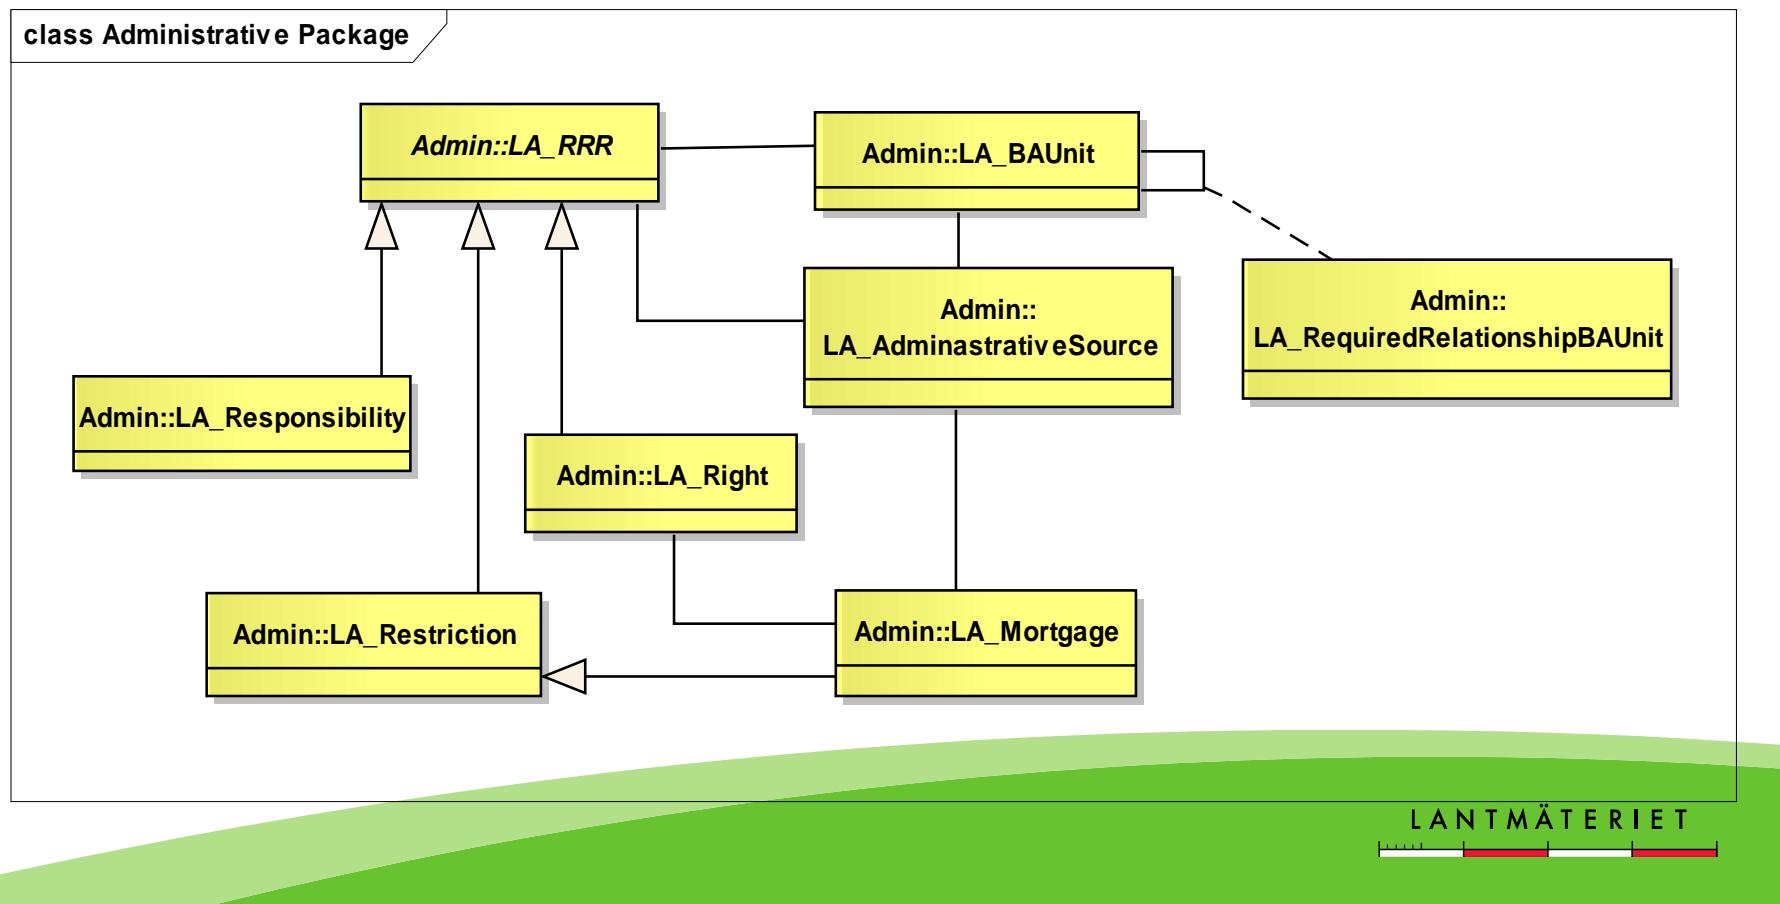

The LADM includes:

- Spatial part (geometry, topology)
- Extensible frame for legal/admin parts

- RRR (Right Restriction Responsibility) has associations with Party (Person) and Basic Administrative Unit (and indirectly to SpatialUnit)
- RRRs are in principle based on legal documents or decisions
- A RRR can be temporal

- Right
"action, activity or class of actions that a system participant may perform on or using an associated resource"
- Restriction
"formal or informal obligation to refrain from doing something"
- Responsibility
"formal or informal obligation to do something"

- A more detailed classification of rights, restrictions and responsibilities than LADM is possible
- Standardization of Real Property Rights and Public Regulations – The Legal Cadastral Domain Model (LCDM)
(PhD-thesis J.M. Paasch, September 2012)
- Classification based on how RRR influence ownership

LANTMÄTERIET

Interests in land are in the LCDM classified as

Private interests:

1. Common

→ e.g. a property jointly owned by other properties

2. Property to property right → e.g. an easement

3. Person to property right → e.g. a personal use right

4. Latent right (a right not executed yet) → e.g. a pre-emption right

5. Monetary liability (a financial claim) → e.g. a mortgage

Public interests:

1. Public general interest

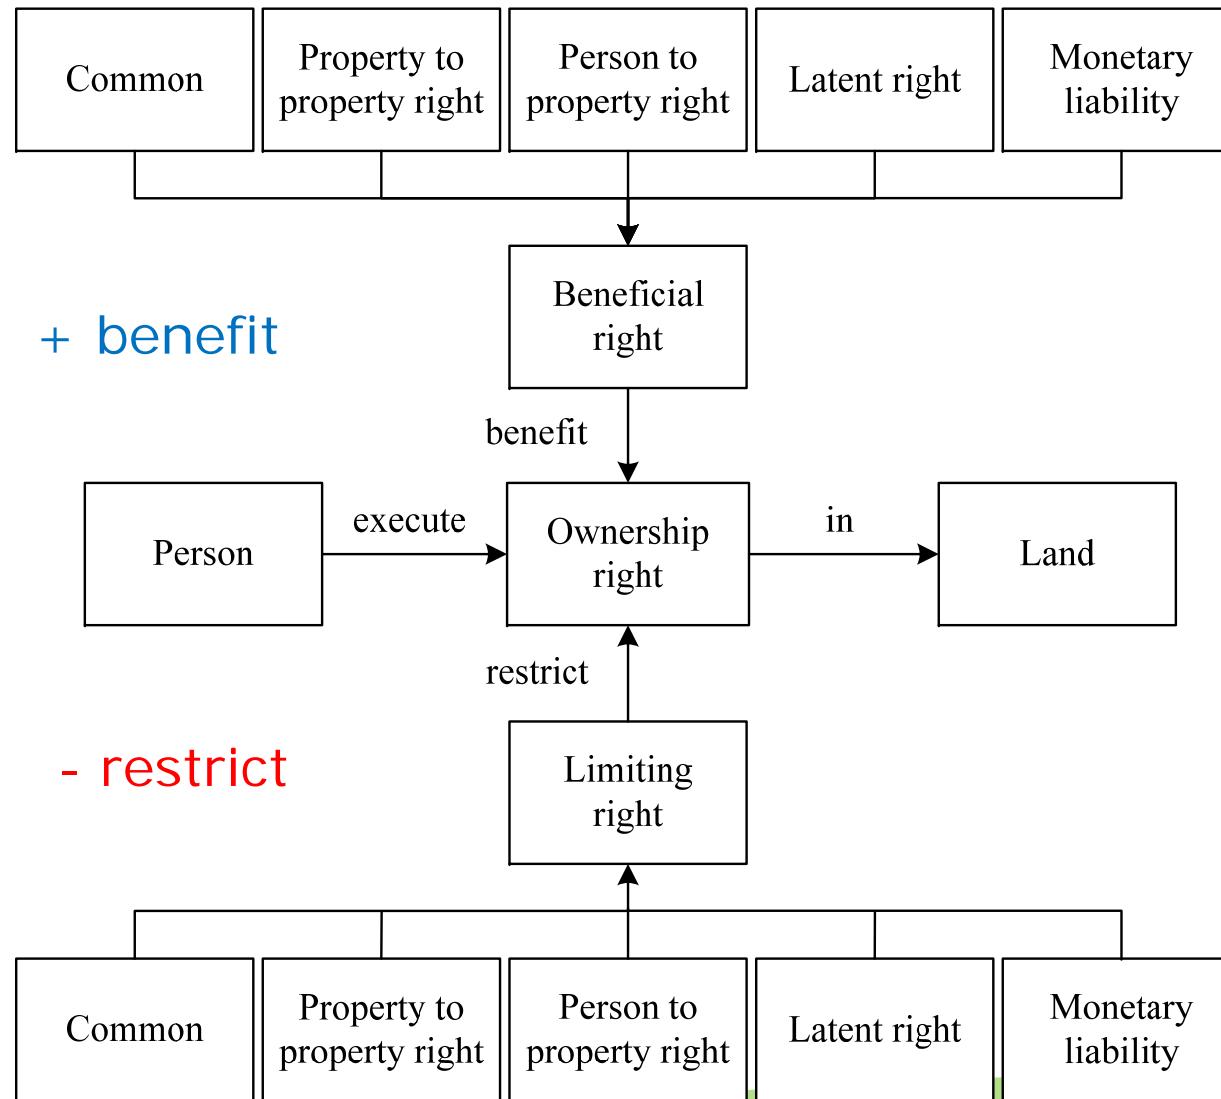

→ e.g. a regulation affecting "all" properties/type of properties

2. Public specific interest

→ e.g. a regulation affecting specific properties, or a dispensation from a regulation

Formal property rights

Explicitly acknowledged by the State and protected by legal means

Informal property rights

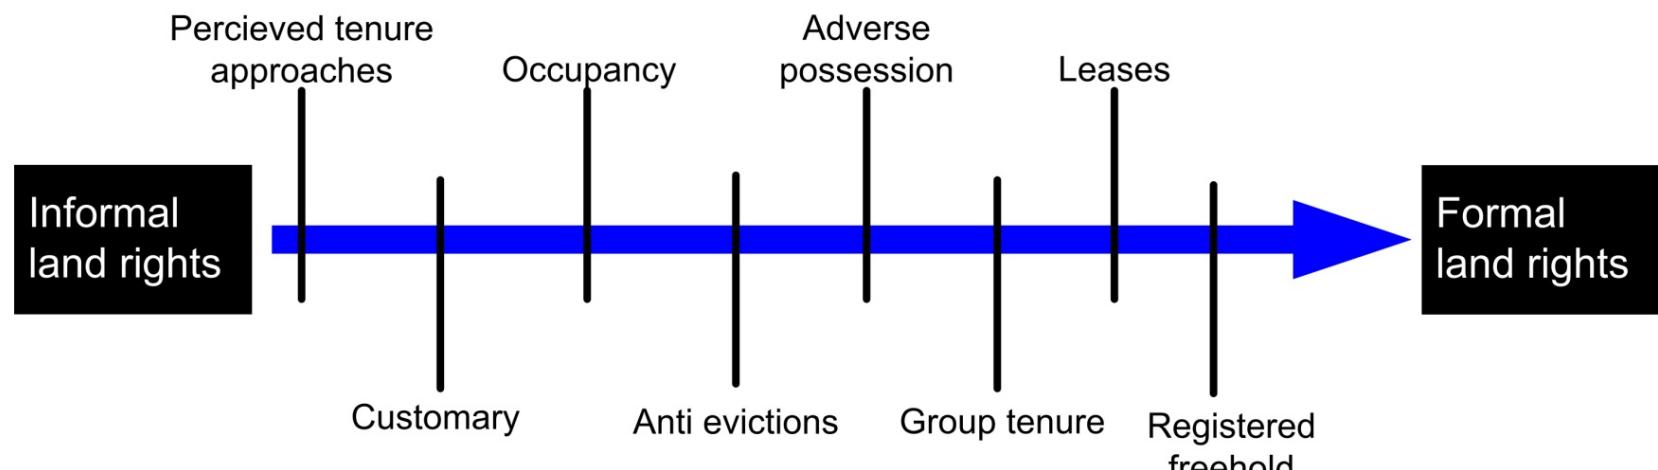

Lack of official recognition and protection

Customary land tenure

The norms derive from and are sustained by the community itself

New LADM classes?

E.g.

LA_RRR: LA_customaryRight

LA_RRR: InformalRight

as proposed in (Hespanha, 2013)

... or extend LADM code lists with non-formal rights?

E.g.

Tenancy

Grazing

Trusteeship

“Terra nullius” (customary lands without owners)

...

Based on (Alden Willy, 2013)

Example of formal and non-formal rights code list

Hierarchy in the code list values is a way to better define the values.

<<codeList>>	
Administrative::	
LA_PartyToPropertyRightType	
1_1_Ownership	Formal
1_2_Lease	
etc	
2_1_Tenancy	Non-formal
2_2_Grazing	
etc	

(FAO)

National identification can be done according to ISO 3166-1 country codes

- Semantic technologies (ontology, etc.) can be used to further provide explicit meaning to code list values
- More refined than just a hierarchy

Glossary

Terms sometimes mean different things to different land registries. All content on this site uses generic definitions. Use this glossary to clarify the meaning of a term.

The generic definition is

Right to build

A right to have building or construction on, over or under someone's land including right to build such a building or construction.

Find the **Netherlands** definition of

Opstalrecht

Separate ownership of the land and:
 - the buildings
 - structures
 - plantings

LANTMÄTERIET

It is possible to extend the LADM code lists to describe non-formal RRRs by using

the *Legal Cadastral Domain Model, LCDM*

and

the *Social Tenure Domain Model, STDM*

More research is needed
