

Digital Twin and Smart Spaces

6th August 2019

Sanghee Shin(shshin@gaia3d.com)

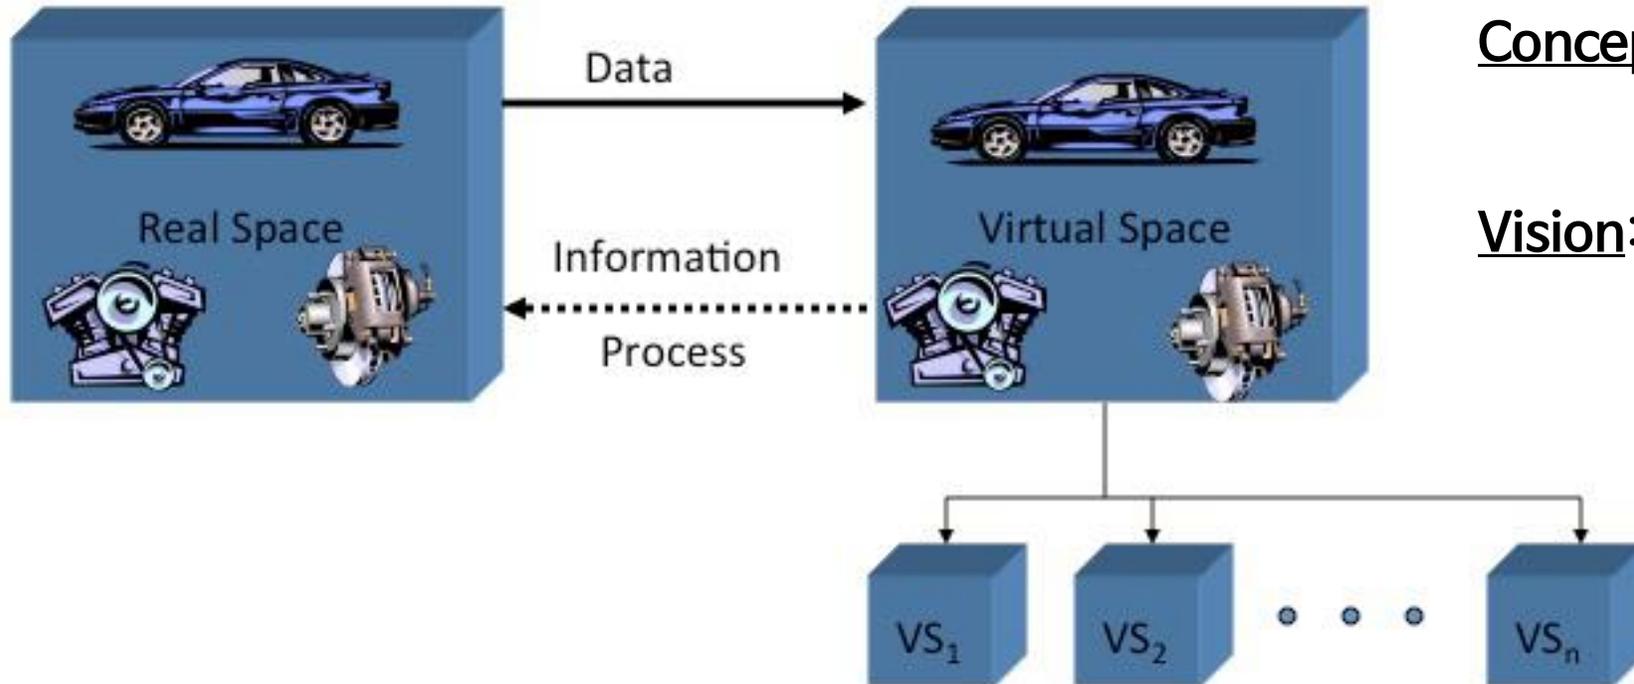

Digital Twin

Digital Twins

A digital twin is a **virtual representation of a physical object or system** across its lifecycle, using **real-time data** to enable understanding, learning and reasoning.

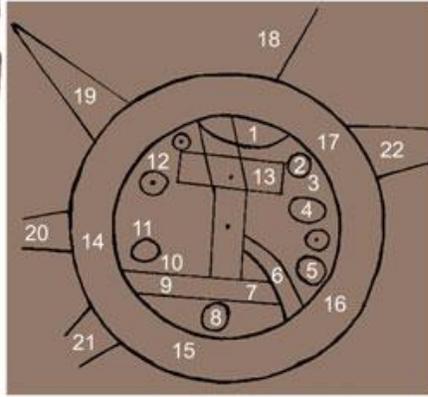

Conceptual Ideal for PLM

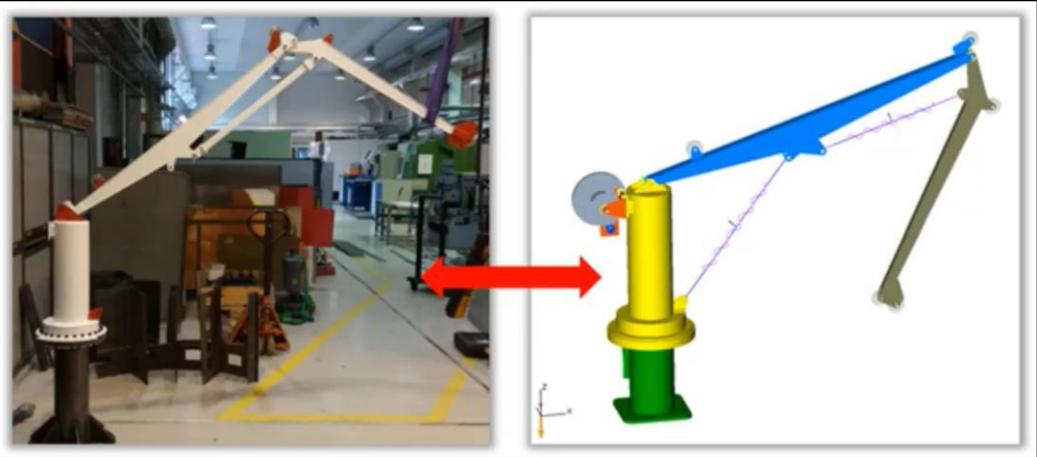

Concept: Digital Informational Construct

Vision: Create, Test, Build

Analog(?) Twin

Examples of Digital Twin

- 1 encoder (main shaft rot.)
- 1 inclinometer and 1 IMU
- 1 inclinometer
- 1 inclinometer

Sensors with high accuracy and sampling >20Hz.

Real-time communication

'Digital Twin' is the new 'Smart City'

AGI, digital twin, GeoCommunity / Gemma / 0 /
Geo events

By Jeremy Morley, Chief Geospatial Scientist

'Digital Twin' is the new 'Smart City'. It's a term that has little consensus on its meaning, but critical importance for those who understand its significance and role in a prosperous future for the UK.

Earlier this month, at the Digital Twin Data Challenge, we saw academics and professionals compete to create a digital model of Bristol: a virtual 'echo' or projection of the city, created in digital form.

자율 원격 비행 시스템 구축
- 고성능 자율원격 드론 교통관리체계
- K드론시스템 구축
- 고고도 유무인 통합 운영

건설교통산업의 혁신
잠재력있는 산업을 적극 발굴 육성하겠습니다.

디지털 공간에 현실이 동일하게 구현되는 국토 가상화(Digital Twin) 기술을 개발하고, 지문 등 생체정보 이용 탑승수속 등 공항 프로세스를 자동화하는 스마트공항도 조성한다는 계획이다.

김현미 국토부 장관은 “국토공간이라는 그릇에 4차 산업혁명과 혁신성장을 스마트하게 담아내겠다”며 “혁신성장을 통해 개인의 삶을 풍요롭게 하는 것은 물론, 미래 대한민국의 새로운 먹거리 발굴에 적극 나설 것”이라고 전했다.

The Rise of Digital Twins in Smart Cities

The rise of digital twins in smart cities

Special Reports 06 Jan 2019 by Sue Weekes: News editor, Smart Cities World

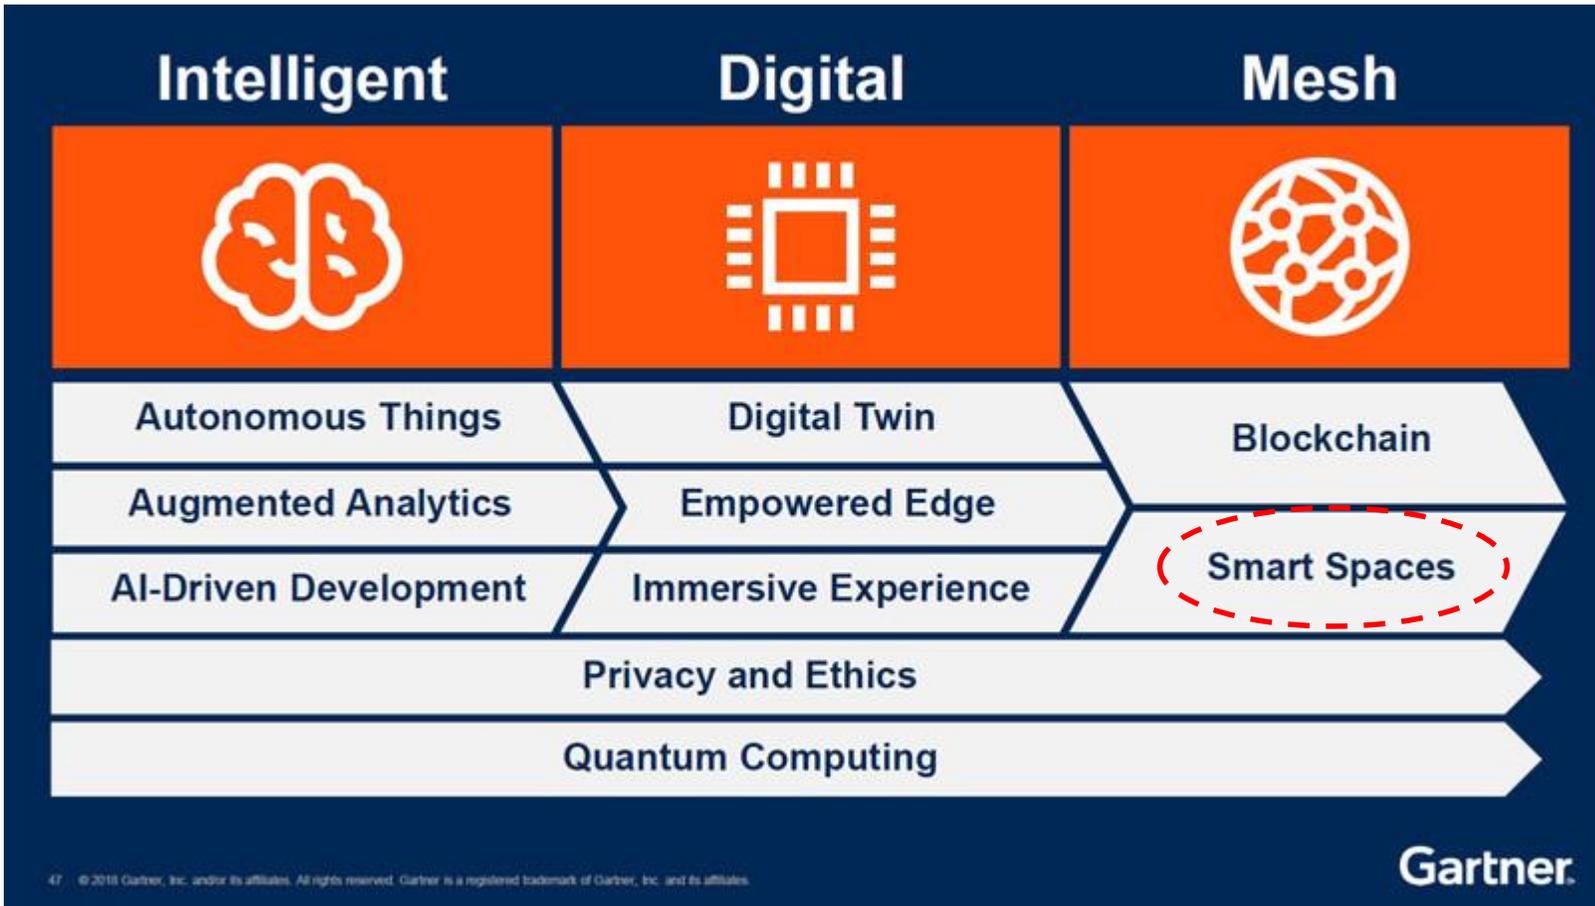

2019 could see virtual 'twins' help to make smart cities a reality.

The digital twin of Amaravati, a smart city being built in India

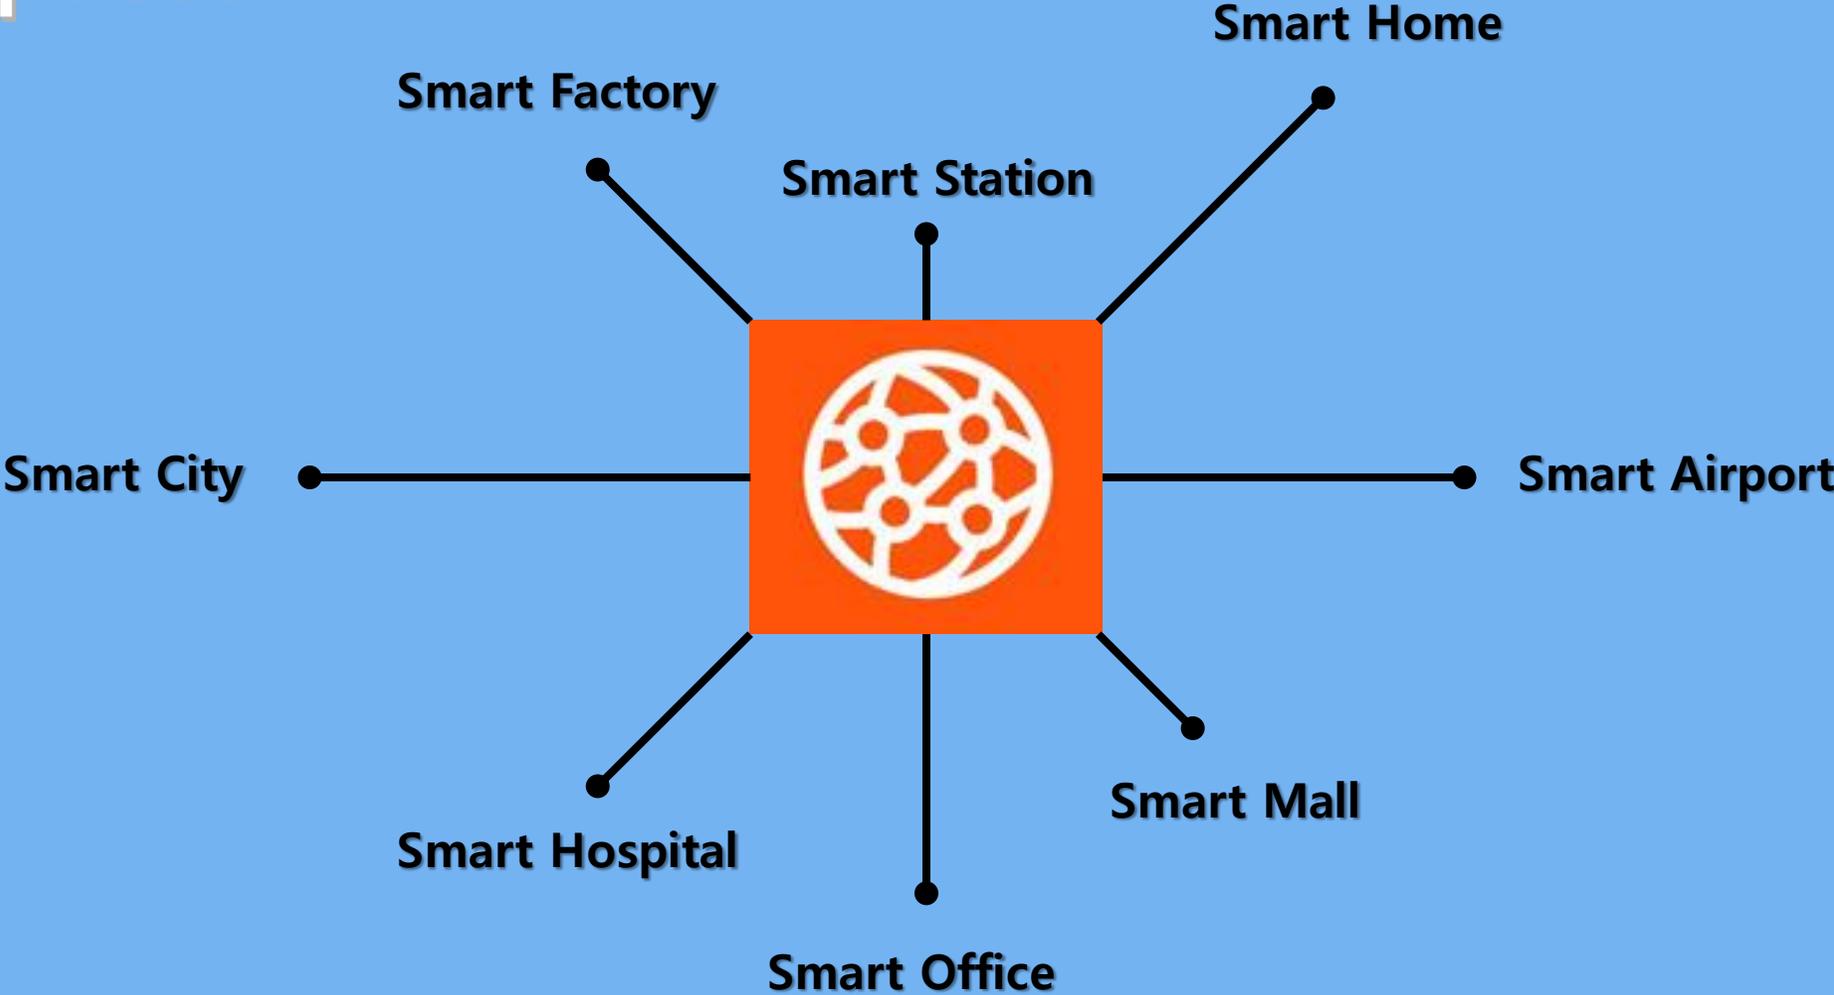

Smart Spaces

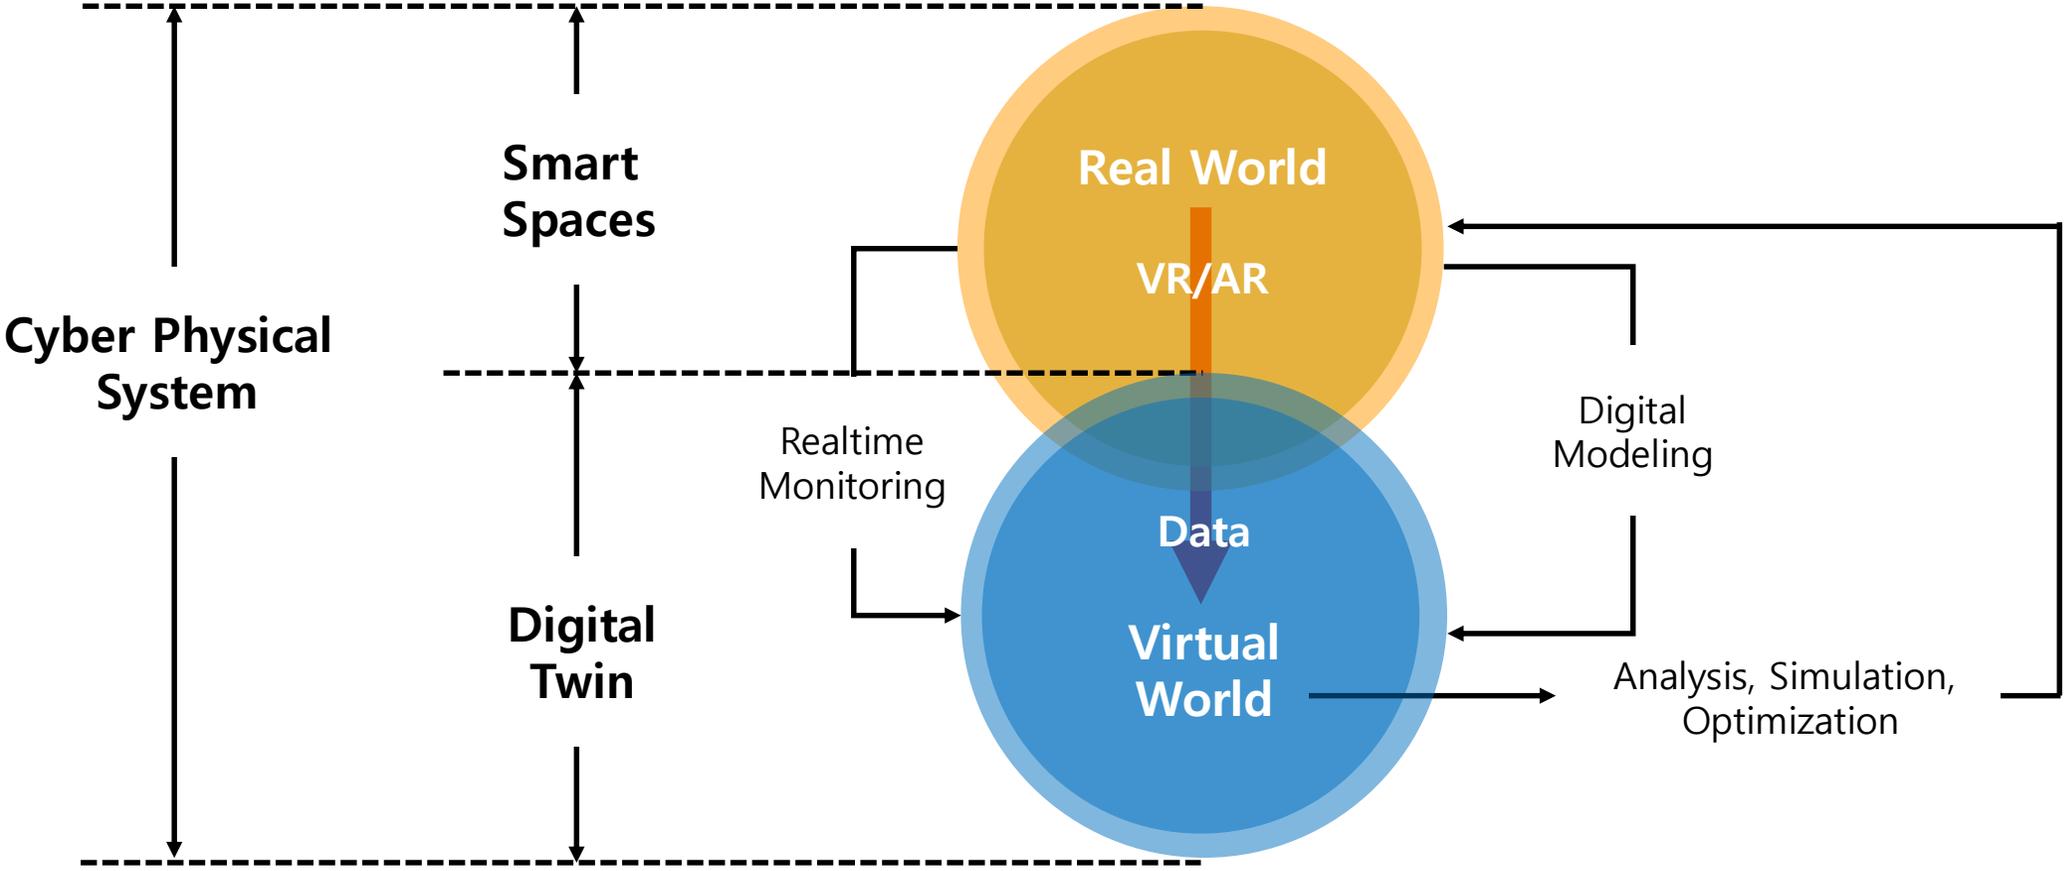

Smart Space

Smart spaces are not some sort of virtual reality, but rather **physical environments** decked out with technology. They are implemented with monitors and sensors that enable **humans and integrated technological systems to interact.**

mago3D = 3D + Web + Open Source

mago3D is a platform for ...

1

Visualizing massive and complex 3D objects including BIM on a web browser

2

Seamless integration of BIM/AEC and 3D GIS in a single space

3

'Digital Twin' that can create parallel worlds in a virtual reality with numerous IoT, sensor data

4

Web based collaborative issue/process management

Introduction – mago3D

mago3D runs on any device

Results: BIM(Indoor/Outdoor) Integration

Lessons Learnt

- Benefits of Digital Twin and Smart Spaces are still unclear.
- Visualizing large and complex objects is still challenging.
- Many clients just want to see *PRETTY* picture!
- 3D analysis, 3D simulation are among wish list that clients want to see on top of full of mago3D platform.
- It's still doubtful how 3D gives any real benefits over 2D.
- 3D is expensive and Digital Twin is more expensive!
- Standards are not widely accepted across industries.
- Standard based modular and distributed architecture is very important for extensible system.

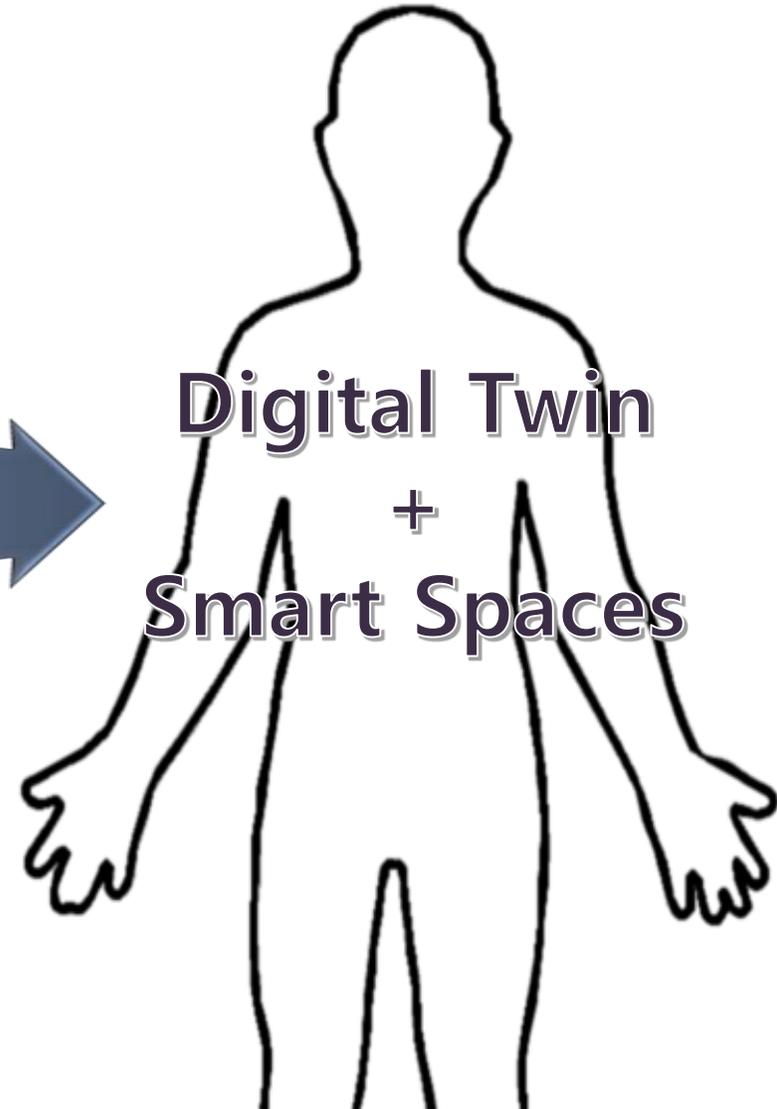

{Indoor, Outdoor}

{Static, Dynamic}

{Objects, Phenomena}

{Overground, Underground}

{Multi-Sensor, Multi-Source}

Thank you!
