

Cadastre2014 Japan – Initiative

for Restoring Original Boundaries by Using Past Aerial Photos

Hiroyuki HASEGAWA and Tsutomu IMASE, Japan

Researchers : Japan Federation of Land and House Investigators' Associations

- 1) To stabilize the geodetic network as the basis of cadastral system
- 2) To revise official provisional cadastral maps into standardized digital maps
- 3) To utilize the advanced satellite surveying, photogrammetry on 3D CAD system

1. Introduction :

(1.4) National Land Survey Act

(5) The cadastral map that is sent to a registry office pursuant to the provisions of Article 20 (1) of the National Land Survey Act shall be kept as a map after registration pursuant to the provisions of paragraph (2) or (3) of said Article is completed; provided, however, that this shall not apply in cases where there are special circumstances to find that it is inappropriate to keep it as a map.

5 国土調査法第二十条第一項の規定により登記所に送付された地籍図は、同条第二項又は第三項の規定による登記が完了した後に、地図として備え付けるものとする。ただし、地図として備え付けることを不相当とする特別の事情がある場合は、この限りでない。

June 2014

2. Worldwide status / agendas in cadastral survey (2.1) From Cadastre2014 to Land Administration Domain Model Standard

The Land Administration Domain Model Standard

Abstract: C. LEMMEN and P. van OOSTEROM, the Netherlands

1. LADM is an international standard

for the land administration domain.

2. LADM covers basic information-related components

of land administration

3. The standard provides an abstract, 3 conceptual models :

- ☑ parties (people and organizations);
- ☑ basic administrative units, rights, responsibilities and restrictions
- ☑ spatial units (parcels, and the legal space of buildings and utility networks)

XXV International Federation of Surveyors
Congress, Kuala Lumpur, Malaysia, 16 – 21
June 2014

2. Worldwide status and agendas in cadastral survey (2.2) Land Administration Domain Model and Social Tenure Domain Model

Specialization of LADM developed by UN Habitat
, the International Federation of Surveyors (FIG) and the
University of Twente, Faculty ITC.

STDM broadens the scope of land administration. formal,
informal and customary land systems.

integrates administrative and spatial components, relationships
between people and land in an unconventional manner on social
tenure relationships in the continuum of the land rights concept
promoted by the Global Land Tool Network and by UN-Habitat
Background
