Deenmark: Strategies for e-Government since 2002...

Quote from the latest strategy:

“Our living conditions and well-being rely on a diversity of natural resources and a healthy environment. It is therefore essential that we plan and manage our natural resources and the environment efficiently. And to do this, we need coherent, nationwide data on the environment that citizens, companies and authorities can trust”

(The Danish Government, 2011, p. 32)
Legal definition of spatial object

5. ‘spatial object’ means an abstract representation of a real-world phenomenon related to a specific location or geographical area;

INSPIRE Directive art 3(5)
Quote from the latest strategy:

“Our living conditions and well-being rely on a diversity of natural resources and a healthy environment. It is therefore essential that we plan and manage our natural resources and the environment efficiently. And to do this, we need coherent, nationwide data on the environment that citizens, companies and authorities can trust”

(The Danish Government, 2011, p. 32)
Conclusions

Suggestions:

1) Tie the legal value to the showing of the map

2) Embed decisions on geographical accuracy of the legal objects of the map in the legislation.
