

# Open Spatial Data available in the Netherlands

Erik Nobbe (Netherlands)

**Key words:** Cadastre; Geoinformation/GI; Laser scanning; Remote sensing; Opendata Aerial photography, lidar, heigth

## SUMMARY

In this session an overview is presented of the different geographical opendata that is available in The Netherlands. This data is used for updating the key-registers in The Netherlands. Free distribution of the data is arranged and presentation services provide an ease access to the data.

Upcoming developments in datacollection and opendata will be described in alignment with the requirements of the end users.
