

Automated Pole Functionalities for Advancing Productivity of Total Station Workflows

Hannes Maar (Switzerland)

Key words: Bridge surveying; Cadastre; Cartography; Cost management; Engineering survey; Positioning; Tunnel surveying; Productivity; technology

SUMMARY

Surveyors are continuously being challenged with more demanding projects. More productive solutions are crucial and have a direct impact on Surveying companies competitiveness and their business success. Measuring more points in less time is required to stay ahead.

This paper will introduce a game changing technology from Leica Geosystems allowing surveyors and measurement professionals to measure more productively than ever before.

Automated Pole Functionalities for Advancing Productivity of Total Station Workflows (11353)
