Key words: Keyword 1; Keyword 2; Keyword 3

SUMMARY

This presentation gives an overview of FrontierSI, which is a non-for-profit collaborative research and development organisation based in Australia, specialising in geospatial data, positioning, and spatial analytics. It focuses on creating innovative solutions in areas such as smart cities, environmental management, infrastructure planning, and precision agriculture. Through partnerships with government agencies, academia, and industry leaders, FrontierSI works to advance the use of geospatial technology for social, economic, and environmental benefits. FrontierSI expertise extends to satellite positioning, spatial mapping, and big data analytics, helping organisations make informed decisions and solve complex problems through cutting-edge spatial science.
