One Profession

CLGE: a definition

CLGE is the **leading representational body** for the Surveying Profession in Europe.

- Promotes the Profession in the EU
- Fosters its development in the Council of Europe

Surveying includes **Cadastral Surveying** which provides security to land and property title and thus underlies the economic base of western society.

Geospatial Information is now ubiquitous in our lives and the Surveyor plays a fundamental role in this field.

CLGE: a definition

The individual Surveyors spread over now 36 member states are the final and most important beneficiaries of our activities.

CLGE also pursues more general aims such as:

- the sustainable development;
- public and individual interests European Citizens.

IPMS Land

- In line with the need for cross-border investment information (land) and for international standards in many land & property related global sectors, we are exploring a collaborative initiative focused on the production of an internationally agreed standard for the reporting of land information.
- This could take the form of a 'checklist' of key land information reporting elements such as tenure security, legal registration, ownership, mapping/measurement, value, rating/taxation and other essentials of the land information jigsaw.
- This consistent, global reporting framework should enable the **de-risking** of the land investment process and the implementation of the voluntary guidelines for responsible land governance.

“From the Wisdom of the ages to
the Challenges of the Modern
World.

Global and Regional Professional
and Institutional Reforms”

Background

- In Europe, there is a strong focus on the Mutual Recognition of Professional Qualifications.
- The goal is to favour a strong internal market with sound competition based on the free movement of citizens, including professionals
- CLGE agrees with this philosophy but we are sure that the European and National legislators have to be careful.
- Over regulation is bad, but under regulation too
- For cadastral surveying we are in favour of strong national regulation, leading in the best case to the public appointment. This goal is endeavoured by CLGE's interest group of publicly appointed and regulated liberal surveyors

1. *Freedom of movement for workers shall be secured within the Community.*
2. *Such freedom of movement shall entail the abolition of any discrimination based on nationality between workers*
3. *It shall entail the right, subject to limitations justified on grounds of public policy, public security or public health:*
“39” (a) *to accept offers of employment actually made;*
(b) *to move freely within the territory of Member States for this purpose;*
(c) *to stay in a Member State for the purpose of employment ...;*
(d) *to remain in the territory of a Member State after having been employed in that State, subject to conditions which shall be embodied in implementing regulations to be drawn up by the Commission.*
4. *The provisions of this article shall not apply to employment in the public service.*

FIG Working Week 2015

The provisions of this chapter (on the right of establishment) shall not apply, so far as any given Member State is concerned, to activities which in that State are connected, even occasionally, with the exercise of official authority.

“45”

The Council may, acting by a qualified majority on a proposal from the Commission, rule that the provisions of this chapter shall not apply to certain activities.

FIG Working Week 2015

*Within the framework of the provisions set out below, restrictions on the **freedom of establishment** of nationals of a Member State in the territory of another Member State shall be prohibited. Such prohibition shall also apply to restrictions on the setting-up of **agencies, branches or subsidiaries** by nationals of any Member State established in the territory of any Member State.*

“43”

*Freedom of establishment shall include the right to take up and pursue activities as **self-employed persons** and to set up and manage **undertakings, in particular companies or firms** within the meaning of the second paragraph of Article 48, under the conditions laid down for its own nationals by the law of the country where such establishment is effected, subject to the provisions of the chapter relating to capital.*

FIG Working Week 2015

“49”

*Within the framework of the provisions set out below, restrictions on **freedom to provide services within the Community** shall be prohibited in respect of nationals of Member States who are established in a State of the Community other than that of the person for whom the services are intended.*

The Council may, acting by a qualified majority on a proposal from the Commission, extend the provisions of the Chapter to nationals of a third country who provide services and who are established within the Community.

FIG Working Week 2015

Overview

- Towards a European Surveyor?
 - The need of regulation and homogenization
 - The publicly appointed surveyor

FIG Working Week 2015

2-pronged approach

- Regulate and harmonize the profession
 - Need of a mutually recognized professional qualification level (nationally and EU)
 - Join our code of Professional Qualifications (letter of intent)
 - Think about a harmonized education system
- Introduce Public appointment
 - Confer/confirm the “Official Authority” entrusted to the cadastral Surveyor

FIG Working Week 2015

European Code of Conduct

CODE OF CONDUCT FOR EUROPEAN SURVEYORS
Issued by the Council of European Geodetic Surveyors –
Géomètres Européens (CLGE - GE)

Preamble

European Surveyors are professionals with the academic and professional qualifications and legal and technical expertise to undertake a range of surveying tasks. A non-definitive definition of the profession is described in Appendix 1 to this Code of Conduct.

The work of European Surveyors is fundamental to the provision, development, maintenance and enhancement of the economic, physical and social setting in which all human activities take place. In their role within the environment, and the functioning of the legal systems of Europe, they recognise their basic responsibility to ensure the protection of both consumers and our unique environment. In this way, European Surveyors make an exceptional and vital contribution to the quality of life for all European consumers.

Their professionalism, skill, expertise and objectivity in achieving the efficient and effective planning and administration of the physical, social, legal and economic environment ensures the quality and sustainability of all of human activities undertaken within Europe. Thus, they have a clear and constant responsibility to the European Community, their respective governments, their clients and to the wider public, for the long-term well-being of both current and future generations.

Their professional expertise and independence which are underpinned by the highest levels of professionalism and ethical principles ensure the quality of surveying services. This is assured by the disciplinary regulators of their national associations, the Code of Conduct and, where appropriate, by legal authorisation and national regulations.

FIG Working Week 2015

Art. 2 – 5.

European Surveyors provide services for which they are competent. They ensure that their employees in the provision of service have the necessary competence to undertake those services

FIG Working Week 2015

Art. 2 – 6.

European Surveyors provide services with the highest levels of professional care and diligence. They are continually updating their skills and knowledge, and incorporating and researching technical developments and improvements into their service provision

FIG Working Week 2015

On 10 July 2014 the European Economic and Social Committee, acting under Rule 29(2) of its Rules of Procedure, decided to draw up an opinion on

Self-regulation and co-regulation in the Community legislative framework
(own-initiative opinion).

The Section for the Single Market, Production and Consumption, which was responsible for preparing the Committee's work on the subject, adopted its opinion on 31 March 2015.

At its 507th plenary session, held on 22 and 23 April 2015 (meeting of 22 April), the European Economic and Social Committee adopted the following opinion by 117 votes to 46 with 9 abstentions.
