

From silos to synergy: Building Australia's first national geospatial information ecosystem with the Digital Atlas of Australia

Lisa Bush (Australia)

SUMMARY

Explore how the Digital Atlas of Australia, the Australian Government's new geospatial platform, is transforming how we connect, manage and use location data. Take a look under the hood at its Integrated Geospatial Infrastructure (IGI) - a national digital ecosystem seamlessly connecting data across borders, systems, and technologies. See how the Digital Atlas is breaking down data silos, to provide easy access and use of hundreds of trusted national datasets in a central location to foster collaboration, efficiency, and innovation.

From silos to synergy: Building Australia's first national geospatial information ecosystem with the Digital Atlas of Australia (13525)
