01

CORPORATE OVERVIEW

CHC Navigation is a technology-driven company providing hundreds of precise mapping, positioning and navigation solutions.

► CHC NAVIGATION TODAY

SERVING MAPPING, POSITIONING AND NAVIGATION APPLICATIONS WORLDWIDE

”

Recognized as one of the **fastest-growing** companies in the geospatial industry, CHC Navigation delivers precise mapping, positioning, and navigation solutions to **4 major industries** across **over 130 countries.**

Geospatial

Machine Control

Navigation

Agriculture

CHCNAV

► CHC NAVIGATION TODAY

A PREMIER PROVIDER OF PRECISE MAPPING, POSITIONING AND NAVIGATION SOLUTIONS

VISION

BUILDING A SMARTER WORLD WITH PRECISE
SPATIO-TEMPORAL INFORMATION.

MISSION

FOCUS ON THE CHALLENGES AND BENEFITS THAT
MATTER TO OUR CUSTOMERS.

PROVIDE COMPETITIVE ACCURATE GEOSPATIAL
INFORMATION SOLUTIONS AND SERVICES.

CREATE MAXIMUM VALUE FOR OUR CLIENTS.

OUR SURVEYING & ENGINEERING SOLUTIONS

CHCNAV technology boosts efficiency and affordability, enabling geospatial professionals to achieve unmatched precision in every project.

SURVEYING & ENGINEERING

GNSS + IMU + AR VISUAL + 3D TECHNOLOGY ENABLE SURVEYING. ANYTIME, ANYWHERE

**GNSS SMART
ANTENNAS**

-

**FIELD
SOFTWARE**

-

**GEODETIC
RECEIVERS**

-

TOTAL STATION

► 2024 SURVEY & ENGINEERING HIGHLIGHTS

ENABLE GNSS RTK ANYWHERE, GET IT RIGHT EVERY TIME

“ Thanks to everyone's collaboration,
we can reach a global leading position.

- ✓ Top 1 Market Share in GNSS RTK Receiver Industry
- ✓ Global GNSS Sales Champion: Over 100,000 Units Annually
- ✓ World's Most Popular Field Survey App with 500,000 Users Globally
- ✓ Best Advanced Technology: GNSS + IMU + Visual + 3D + SLAM

► COMPLETE SOLUTIONS FOR GNSS SURVEYING

FROM GEODETIC SURVEY TO CONSTRUCTION SITES

GNSS RECEIVERS

Efficient and advanced with latest GNSS,
Auto-IMU and Visual technology fusion

DATA CONTROLLER

Rugged for any field work in
any conditions

SURVEYING & MAPPING SOFTWARE

User-Friendly and Feature-Rich All-in-One
Workflow from Field to Office

▶ POWERED BY THE iSTAR PVT ALGORITHM

BOOST SPEED AND ACCURACY IN DIFFICULT ENVIRONMENT

RTK FIX RATE INCREASED BY 20%

In complex environment such
as urban and solar-active areas

RTK TIME TO FIX REDUCED

Enhance GNSS survey productivity in areas
with tree canopies and building obstructions

WRONG FIX REJECTION ENHANCED

Under tree canopy,
Wrong fix > 50 cm are eliminated.
Accuracy < 10 cm increased by 15%

RUGGED ANDROID TABLETS & SMARTPHONES

BOOST PRODUCTIVITY OF MOBILE WORKFORCE

ANDROID TABLETS

Rugged Android tablet for professional data collection and asset management

HIGH-ACCURACY

Bring centimeter accuracy at users' fingertips for mapping and surveying

GNSS RTK SMARTPHONE

Enable cm-level data collection for precision GIS

► CHCNAV SURVEY & ENGINEERING SOLUTIONS

ENABLE GNSS RTK ANYWHERE, GET IT RIGHT EVERY TIME

VISUAL NAVIGATION AND STAKEOUT

EFFORTLESS ONE-STEP STAKEOUT AT A GLANCE

STAKEOUT EFFICIENCY INCREASED BY 50%

FEATURES

Visual navigation and visual stakeout provides an immersive 3D visual experience, guided by a clear, eye-catching directional arrow and real-time distance.

BENEFITS

Simplify the stakeout process, allowing for quick completion in seconds and increasing efficiency by up to **50%** for less experienced field operators.

CAD-AR VISUAL NAVIGATION & STAKEOUT

BOOST OVERALL EFFICIENCY BY 40%

CAD integrated into AR reality

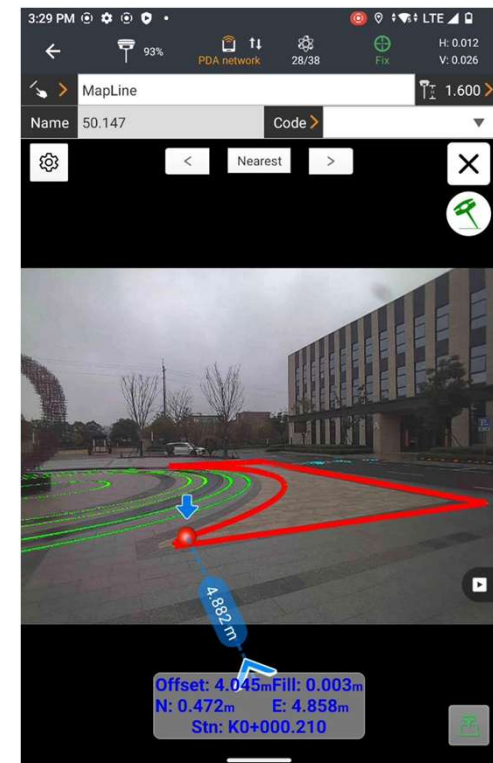

- ✓ 50% faster dense point stakeout without constant interface switching

- ✓ Real-time CAD AR stakeout, precision without detours

- ✓ Smart construction path prediction, enhance 40% overall stakeout efficiency

CASE 1:
AR OVERLAY SIMPLIFIES ROADS REDLINES REVIEW & VERIFY CENTRELINES

**CASE 2:
SMART ASSISTANCE PREDICTS PIPELINE DIRECTION: +60% EFFICIENCY**

VISUAL SURVEY W/ VIDEO PHOTOGRAMMETRY

ACCURACY COMES INTO VIEW: MEASURE ANY POINT WITH EASE

BEYOND GNSS RTK SURVEY

FEATURES	BENEFITS
Enable visual survey with the premium camera, delivering survey-grade 3D coordinates from real-world video in seconds.	Measuring previously hard-to-reach, signal-obstructed and hazardous points has become a breeze.

3D MODELING BOOST YOUR JOB

COMPLEMENT AERIAL SURVEYS VIA UAV+I93

DOUBLE THE EFFICIENCY OF FIELD AND

FEATURES	BENEFITS
The i93 GNSS can be used to complement aerial surveys by integrating UAV and i93 RTK data for joint modeling.	Enhance aerial surveys and replace traditional photo-based modeling, removing distortion, gaps, and blurs caused by drone-mounted camera angles, especially in occluded areas.
Compatible with popular 3D modeling software , such as ContextCapture/ Smart3D.	Use your existing software without additional expenses to optimize your 3D models.

SOLUTION

OPTIMIZE MODEL WITH UAV
+ VISUAL RTK JOINT MODELING

EVOLUTION

SINGLE OBJECT MODELING
WITH VISUAL RTK ONLY

RTK Perfect Partner: LandStar Field Survey APP

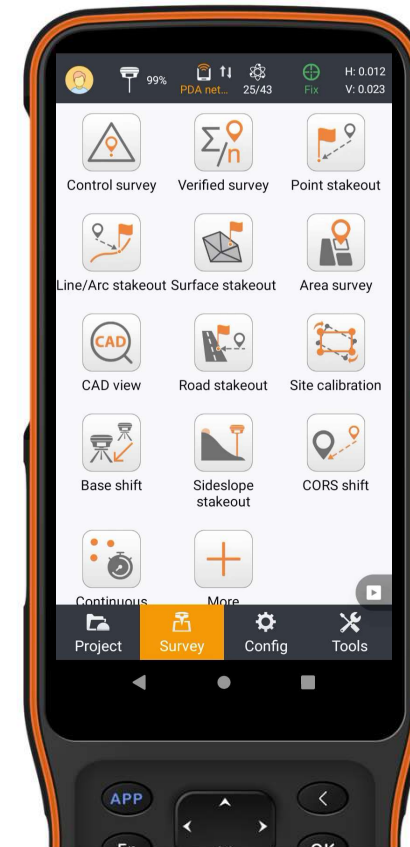

**CAD + 3D upgrades in
graphics performance**

**Application
versatility**

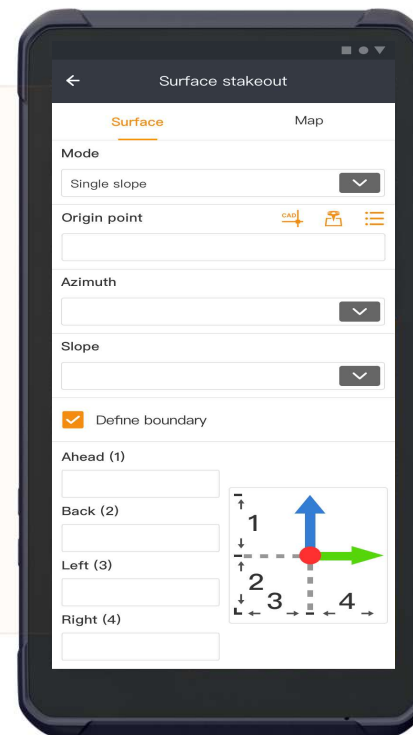

Smoothly open 20 MB DWG/
200 MB DXF CAD base maps
in just **8** seconds

Data source: CHCNAV laboratory test results

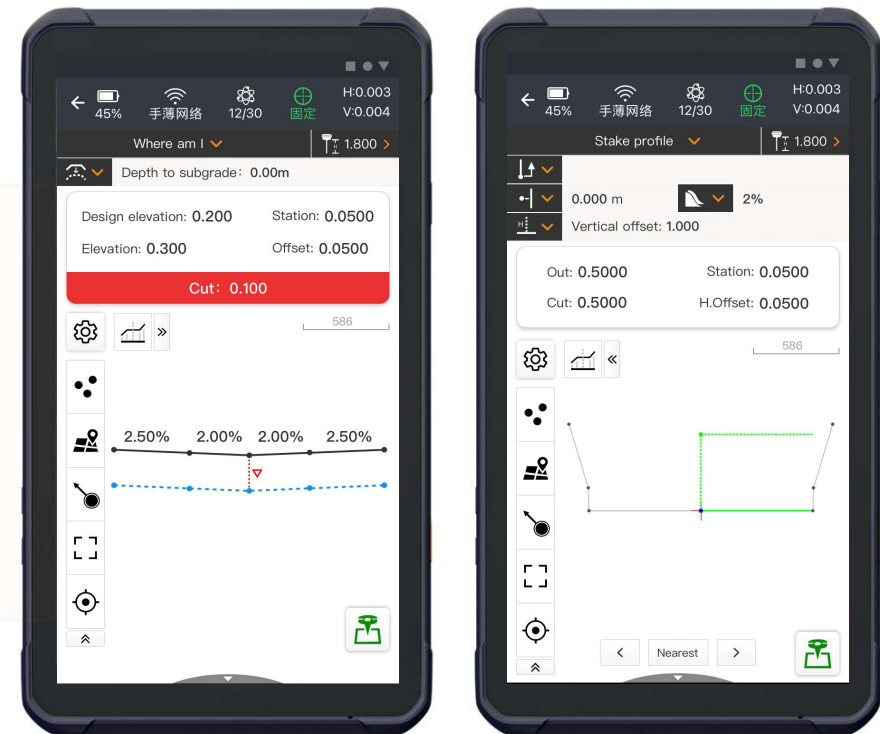

Supports 5 major surface

- Support elevation plane, single slope, XY slope, 3 points slope, surface.
- Make your surface stake-out work more efficient.

Supports the stake-out of various road elements

- Stake-out profile, slope, etc...
- “Where am I” function
- Customized navigation information.

PART
04

3D EARTHWORK VOLUME CALCULATION

**Refining TIN mesh with
terrain-based line
constraints**

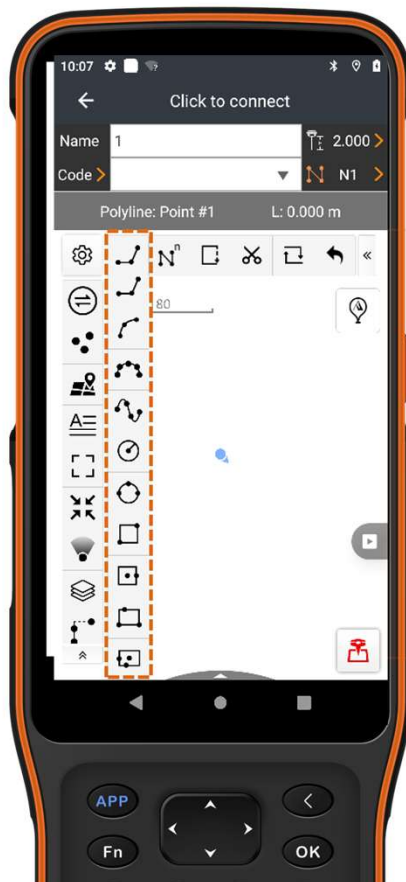

**Earth volume calculation
accuracy is as high as
99.98%**

Support 3D view

**Preview, build TIN and edit
directly via 3D view**

**Improve earthwork
calculation accuracy and
work efficiency**

CORRESPONDING LINE TYPES FOR ALL TERRAINS

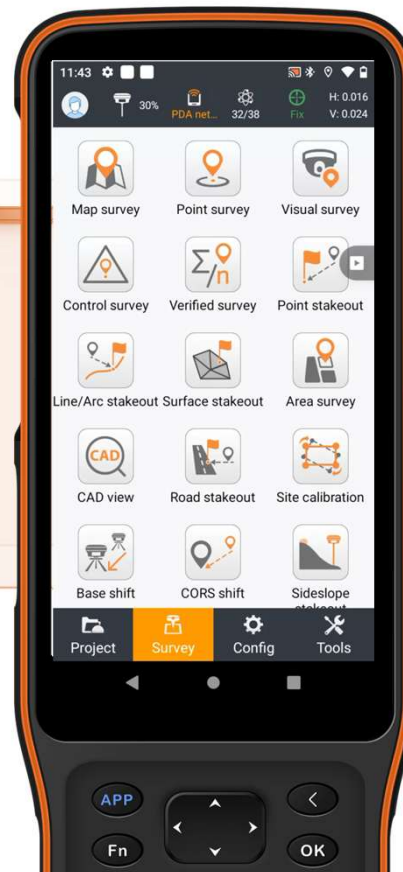

Supports 12 major line types

- No need to select the code, only need to switch the line type to continuously collect data.

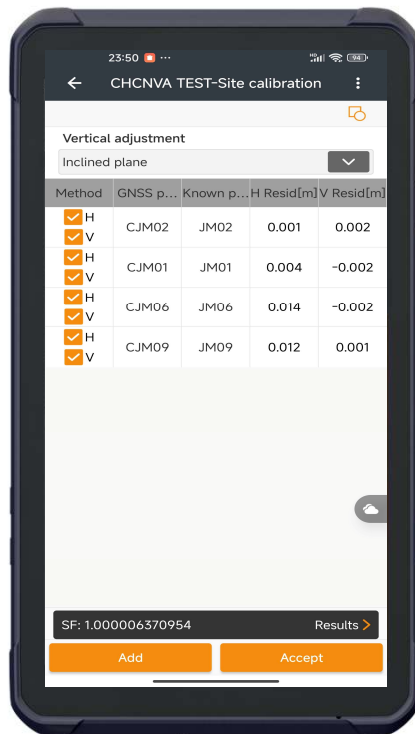

CONVENIENT ZIP-ZAG SURVEY

**A single person
can survey and map
multiple road lanes
at the same time**

**Streamline road
surveys with
multiple lanes**

EXPORT SITE CALIBRATION FILES

**Export site calibration data
to your MC system easier**

Supports Multiple Formats

- Calson LOC file (.loc)
- COT file (.cot)
- Trimble CAL file (.cal)

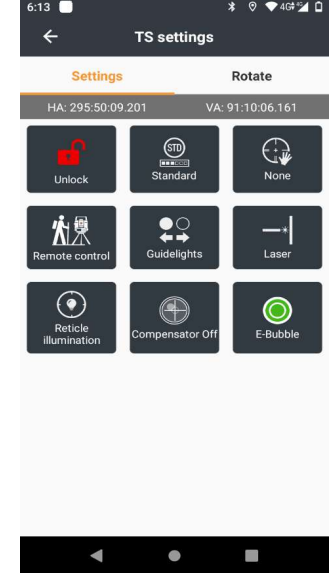

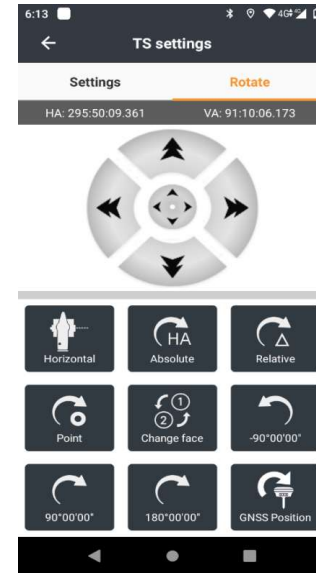

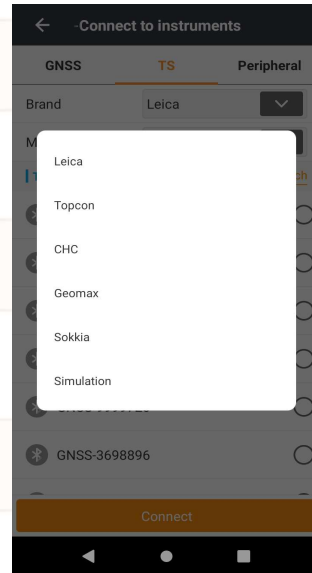

LandStar directly controls the total station

A single person can control the total station to measure and stakeout

Once you learn the LandStar software, you can learn how to measure and stakeout with total stations

03

INTELLIGENT 3D REALITY CAPTURE SOLUTIONS

HANDHOLD SCAN SYSTEM

DEEPLY INTEGRATED OF PRECISE RTK AND SLAM

The RS10 brings a new approach to geospatial surveying by integrating GNSS RTK, laser scanning and visual SLAM technologies into a single platform designed to improve the efficiency and accuracy of indoor and outdoor 3D scanning and surveying tasks.

RS10 looks like standard handheld SLAM device, but it's more than just it. This innovative design cleverly addresses the challenge of RTK's inability to measure in areas with weak or fully lost GNSS signals, while giving the RS10 the ability to efficiently survey in areas that are difficult to reach manually, making field job simpler and more reliable.

HANDHOLD SCAN SYSTEM

HOW RS10 CAN REACH THE MOST PRECISE RESULT

WHAT IS AN AIRBORNE LIDAR

LIDAR BENEFITS FOR HIGH PRECISION & EFFICIENT SURVEY

- LiDAR is a laser scanning remote sensing technique which stand for Light Detection and Ranging.
- It is especially suited for topographic surveys of vegetation, rugged, or hard to access zones, which help surveyors to shift from the exhausting practice of mapping with heavy Differential GPS tools & ETS (Electronic Total Stations) to the time-saving method of utilizing UAVs/drones equipped with high powered technology.

COMPARE WITH PHOTOGRAMMETRY

LIMITATIONS AND PAIN POINTS OF TRADITIONAL SOLUTION

More limitations

Especially in forest or dense vegetation area, dark environment or bad weather etc

Need GCP control

Surveyer need go on-site to prepare in advance

Slow data processing

Dense vegetation, bright sunlight etc

AERIAL LIDAR SYSTEM

ALPHAIR SERIES: FROM MID RANGE TO HIGH END SOLUTIONS

ALPHAIR 9

Max range **600m** (80%)
Max **500** kHz & **6** returns
FOV **75** degree
Internal **26MP** camera
Weight **1.45kg**

ALPHAIR 10

Max range **800m** (80%)
Max **500** kHz & **8** returns
FOV **75** degree
Internal **45MP** camera
Weight **1.55kg**

ALPHAIR 15

Max range **2400m** (80%)
Max **2000** kHz & **16** returns
FOV **75** degree
External camera
Weight **2.5kg**

ADVANTAGES OF CHCNAV LIDAR

NO.1: PREMIUM LASER SCANNER HEAD FOR HIGH PRECISION

Tilted column prism scanning
patented technology

ADVANTAGES OF CHCNAV LIDAR

NO.2: ALL-IN-ONE HIGHLY INTEGRATED

- Survey grade laser scanner head;
- Full frame industry level camera sensor;
- High precision IMU system;
- AA9/AA10 with X500 UAV: max **50 minutes** flight duration;
- AA15 with X500 UAV: max **40 minutes** flight duration;

ADVANTAGES OF CHCNAV LIDAR

NO.3: PIONEERING POINT CLOUD AND IMAGE FUSION MODELING

Workflow:

- Step1: Generate triangular mesh based on point clouds;
- Step2: Create mesh models without textures;
- Step3: Merge the colors and textures with the mesh mesh models;
