Kadaster International

A black and white portrait of Mark Twain, showing his characteristic wild white hair and mustache. He is looking slightly to the left of the camera with a serious expression. The background is dark, making his face and hair stand out. Overlaid on the left side of his face is a quote in large, white, bold, sans-serif capital letters.

**“BUY LAND, THEY’RE NOT MAKING IT
ANYMORE.”**

MARK TWAIN

Fit-For-Purpose Land Administration Guiding Principles

Christiaan Lemmen

Fit For Purpose Land Administration

- **The cadastral gap:**

Only about 40 countries in the world have well functioning land administration systems.

In most developing countries less than 10 per cent of the land is included in formal systems.

- **Limitations:** Western style systems are too costly and too time consuming and capacity demanding – and they do not serve the millions of people whose tenure are predominantly social rather than legal.

- **Benefits:** A Fit-For-Purpose approach will ensure that basic and appropriate land administration systems are built within a relatively short time frame and at affordable costs ... they can then be incrementally improved over time..

Fit-For-Purpose – what is it ?

- **Fit-for-purpose:** The systems should be designed for serving the basic purposes such as including all land; provide secure tenure for all; and control of the use of land. – rather than being guided by high tech solutions and costly/time consuming field survey procedures.
- **Flexibility:** Scale and accuracy relate to geography, density of development, and budgetary capacity; The legal and institutional framework should be designed to accommodate both legal and social tenure rights.
- **Incremental improvement:** Advanced Western style concepts may well be seen as the end target – but not as the point of entry.

Fit-for-Purpose Land Administration

<i>KEY PRINCIPLES</i>		
Spatial Framework	Legal Framework	Institutional Framework
<ul style="list-style-type: none">▪ Visible (physical) boundaries rather than fixed boundaries▪ Aerial / satellite imagery rather than field surveys▪ Accuracy relates to the purpose rather than technical standards▪ Demands for updating and opportunities for upgrading and ongoing improvement	<ul style="list-style-type: none">▪ A flexible framework designed along administrative rather than judicial lines.▪ A continuum of tenure rather than just individual ownership▪ Flexible recordation rather than only one register▪ Ensuring gender equity for land and property rights.	<ul style="list-style-type: none">▪ Good land governance rather than bureaucratic barriers▪ Holistic institutional framework rather than sectorial siloes▪ Flexible IT approach rather than high-end technology solutions▪ Transparent land information with easy and affordable access for all

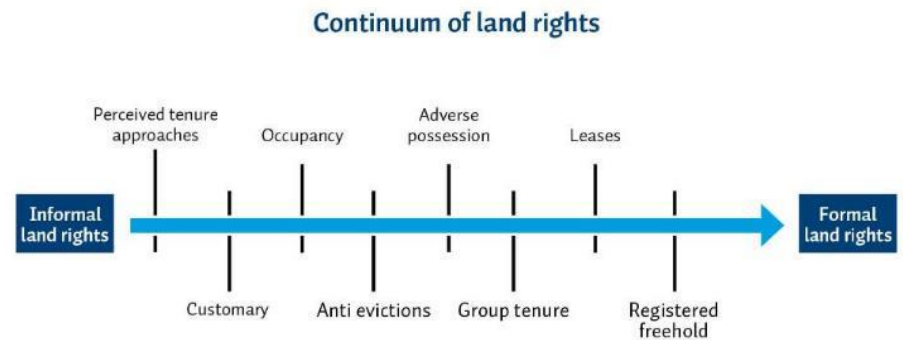

Land Rights – Aspects to be Supported

- Recognise
- Record
- Review

<i>KEY PRINCIPLES</i>		
Spatial framework	Legal framework	Institutional Framework
<ul style="list-style-type: none"> ▪ Visible (physical) boundaries rather than fixed boundaries ▪ Aerial / satellite imagery rather than field surveys ▪ Accuracy relates to the purpose rather than technical standards ▪ Demands for updating and opportunities for upgrading and ongoing improvement 	<ul style="list-style-type: none"> ▪ A flexible framework designed along administrative rather than judicial lines. ▪ A continuum of tenure rather than just individual ownership ▪ Flexible recordation rather than only one register ▪ Ensuring gender equity for land and property rights. 	<ul style="list-style-type: none"> ▪ Good land governance rather than bureaucratic barriers ▪ Integrated institutional framework rather than sectorial silos ▪ Flexible ICT approach rather than high-end technology solutions ▪ Transparent land information with easy and affordable access for all

'Recognise'

- Recognition, classification and development of a typology in land rights on the basis of an assessment of existing *legitimate rights* at the country level
- Publication in a National Tenure Atlas

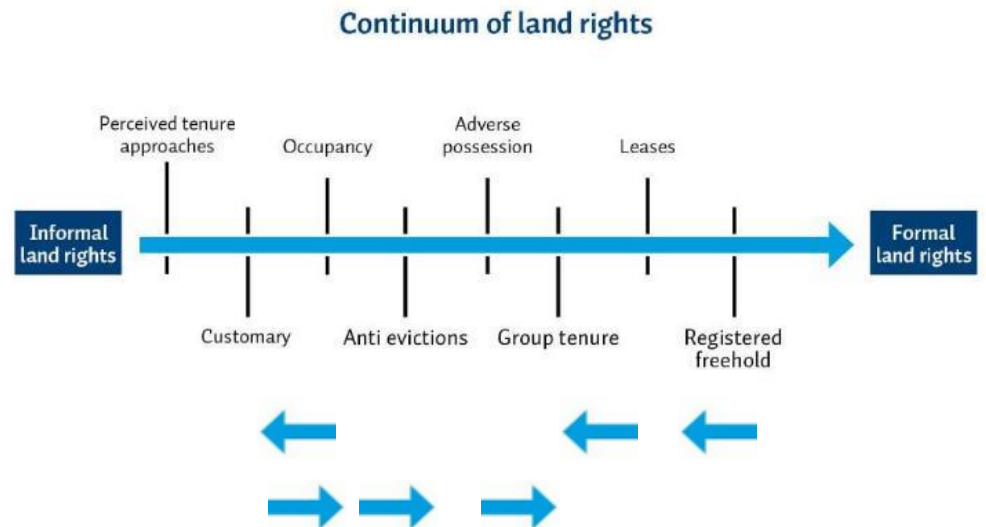

'Record'

- Collecting data on evidence of land rights based on FFP approaches in land administration

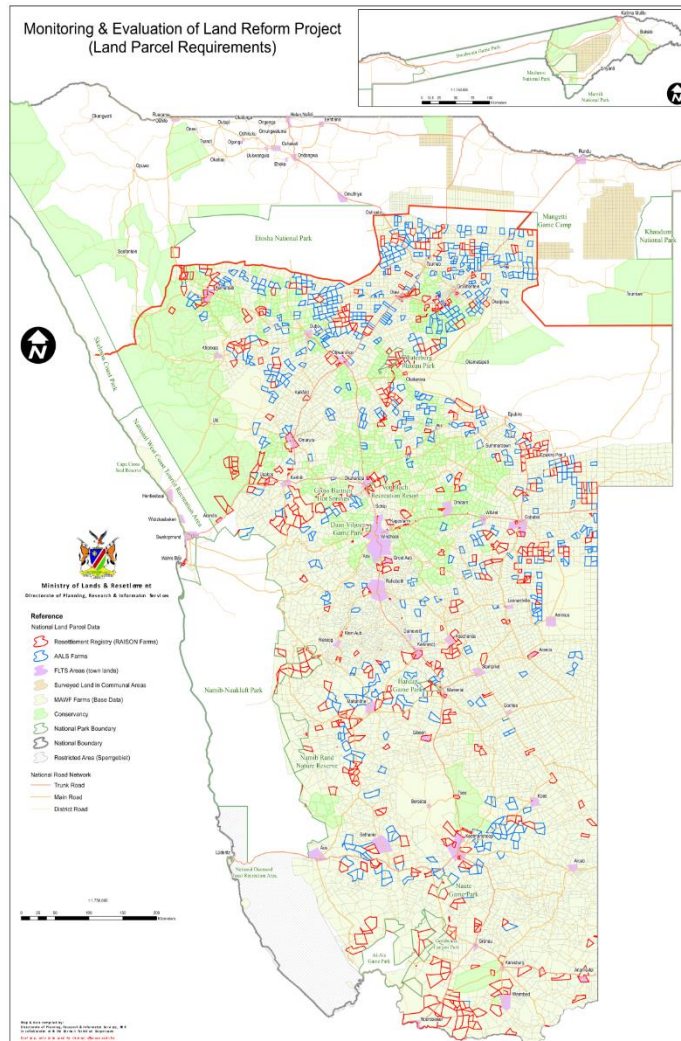

‘Review (Conversion)’

- Assessing the evidence of rights and any possible outstanding claims and when conditions are met, the security of the rights will be increased

'Spatial enablement' improves tenure security of urban poor

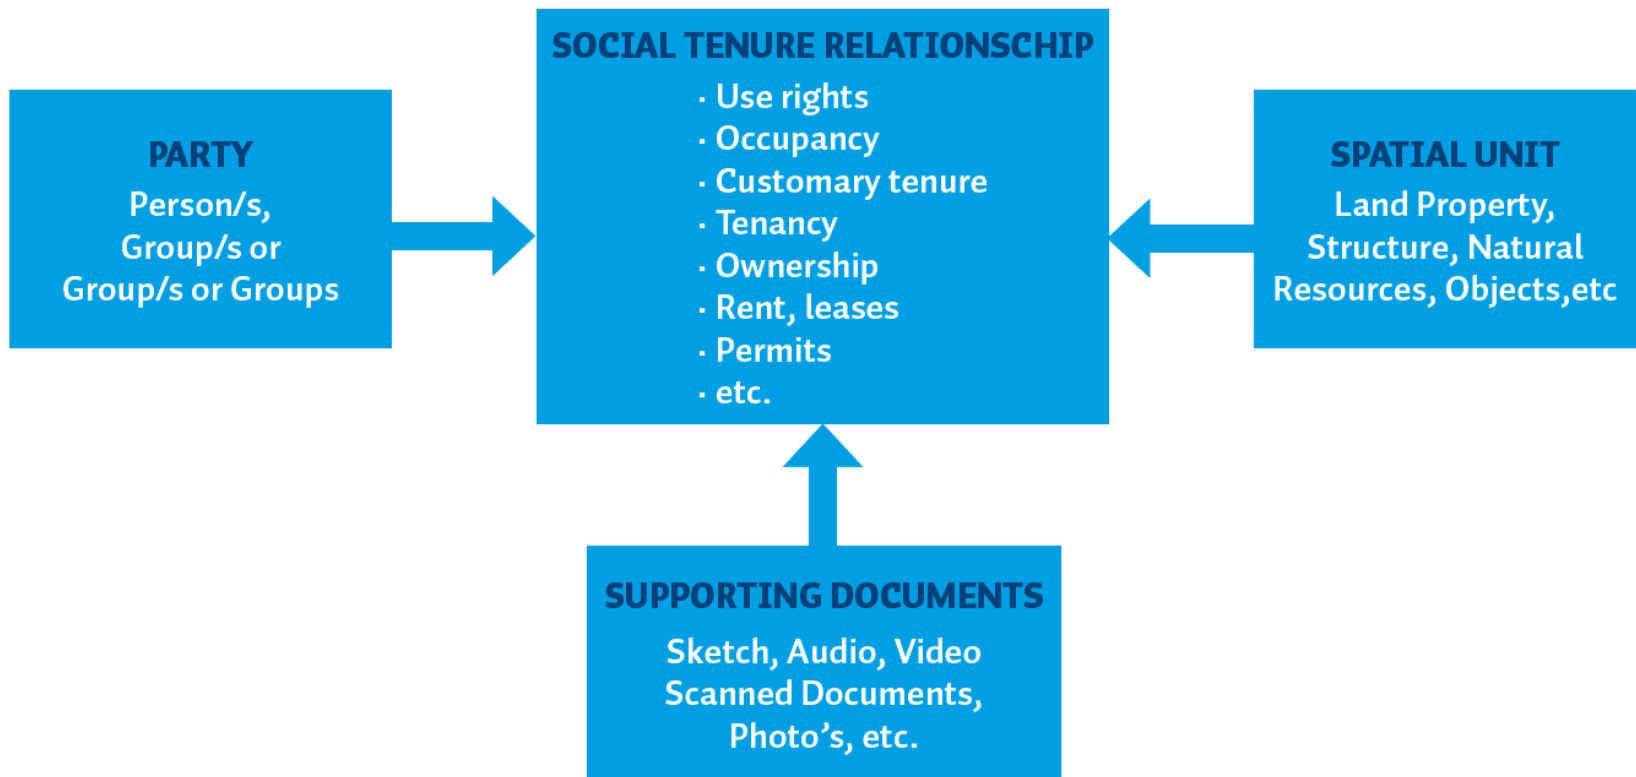

STDM: Conclusions by Users

- Captures the complex tenure situations of informal settlements
- Can be customized – resettlement, planning for service delivery or census
- Is easier, faster and more flexible than conventional surveying methods
- Allows participation of the community – data collection, verification and management: this is crucial for data quality and implementation of further plans based on the data
- Supports verifications and updates

Success and acceptance of STDM depend on political/ administrative goodwill and appreciation of community

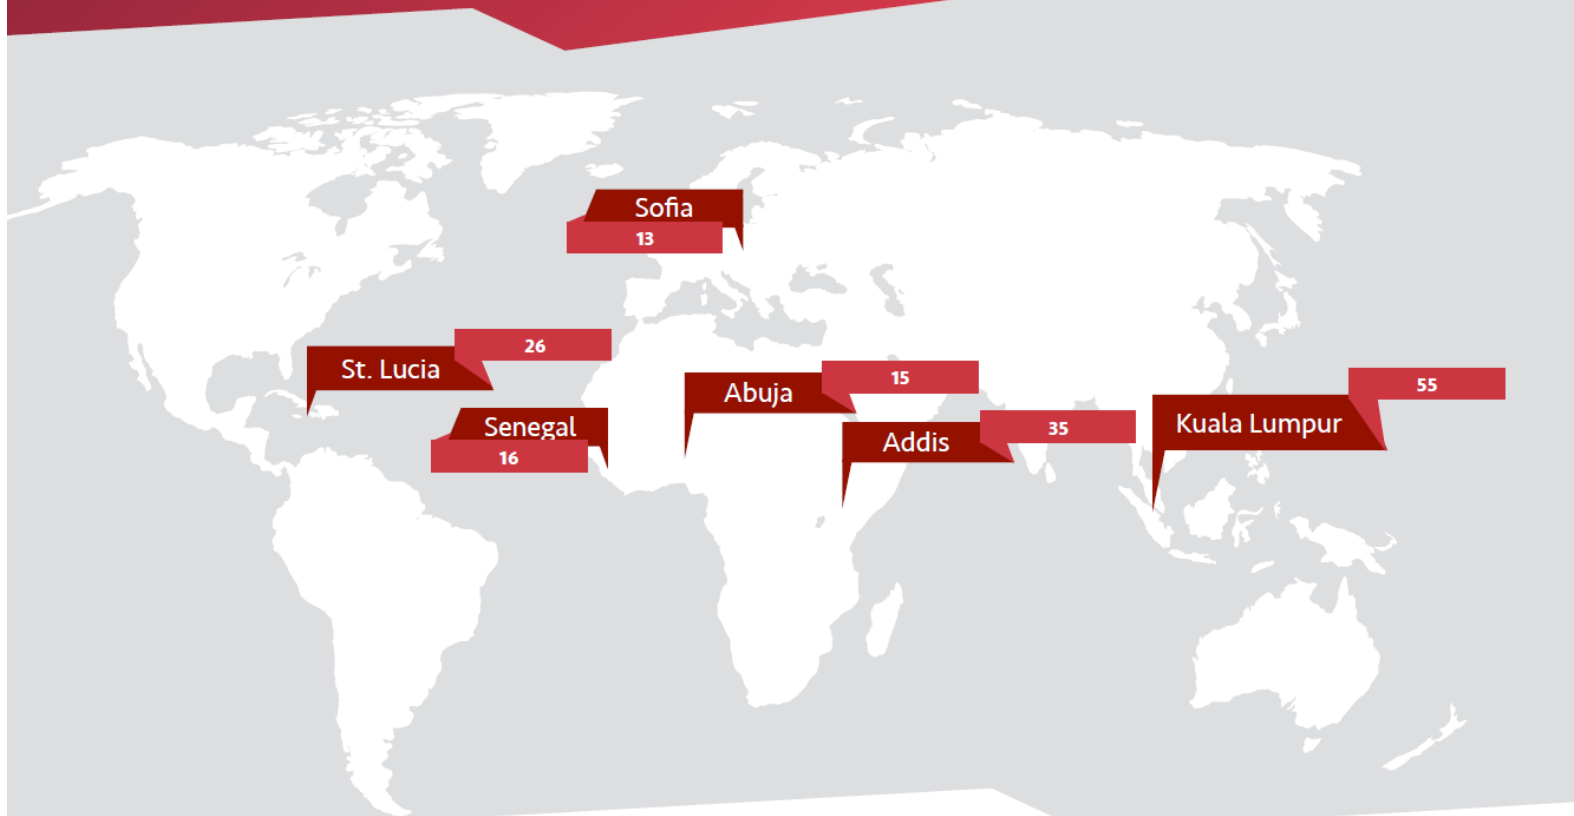

STDM Conceptual Model

STDM

UN-Habitat/GLTN Social Tenure Domain Model - FIG YSN

WE OFFER 3 KINDS OF SERVICES

GOOD-CHEAP-FAST

BUT YOU CAN PICK ONLY TWO

GOOD & CHEAP WON'T BE **FAST**

FAST & GOOD WON'T BE **CHEAP**

CHEAP & FAST WON'T BE **GOOD**

Fit-For-Purpose Land Administration

As little as possible – as much as necessary (for the purpose)

Fast – Cheap – and Good (enough for the purpose)

Concluding remarks

- Land administration is basically about people. It is about the relation between people and places, and the policies, institutions and regulations that govern this relationship.
- When building land administration systems in less developed countries - focus should be on a “fit-for-purpose approach” that will meet the needs of society today and can be incrementally improved over time.
